(54) Title: **RETAINING ELEMENT FOR BUILDING SHEETS**

(57) Abstract: The invention relates to an elongate retaining el-  
ement for building sheets, having in plane perpendicular to its di-  
rection of elongation, a head part which is substantially triangular  
in cross section, said head part comprising one or more mov-  
able rotationally symmetrical elements, said elements being posi-  
tioned at one or more vertices of the triangle, wherein said head  
part comprises one or more mountings in which the elements for  
engaging the building sheet are mounted and in that the mount-  
ings are attached to the head part by fixing means.
